

We are a company that continues to innovate.

Rubbertrax+

Turning Tires Into Tiles!

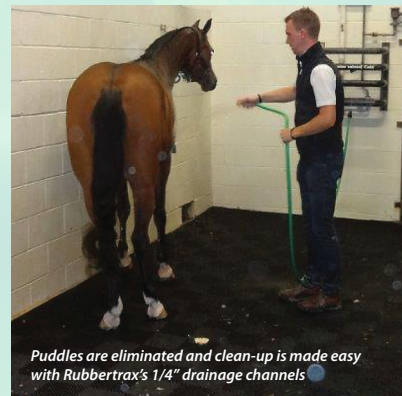

Swisstrax is one of the country's top producers of interlocking floor tiles made from recycled tires. We know that the equestrian market appreciates and demands superior performance, which is why our recycled rubber tiles, **Rubbertrax**, are designed to be one of the longest-lasting, highest valued recycled flooring systems for the industry.

Easy to install with no tools required, our tiles provide great footing for horses while a full 1/4" drainage channel through the bottom of the tiles eliminates any puddles during washing. Lightweight, unlike conventional rubber mats, **Rubbertrax** tiles are easy to clean and maintain.

Rubbertrax recycled rubber flooring from Swisstrax comes in black, and

keeps thousands of tires out of landfills every year.

Puddles are eliminated and clean-up is made easy with Rubbertrax's 1/4" drainage channels

Studies by the U.S. Environmental Protection Agency show that more than two million tons of used carpet are dumped into the nation's landfills annually. **Rubbertrax** flooring keeps tons of material out of landfills.

Rubbertrax enables consumers to purchase a superior product with the added benefit of protecting the environment.

Specifications

- Made from PolyDyne Engineered Rubber Powder.
- Chemical resistant.
- PP & Polydyne material.
- Standard Test DIN 18032, NFSI, WGE.
- No pollution to drinking water.
- 7 Year warranty.

Tile Size Info

- 15.75" x 15.75", Height 0.75"

Applications

- Wash Areas
- Stalls
- Stable Supply Rooms
- Event Floors and Display Pads
- Walkways
- Entrance Areas
